**TE 3.34 – Industrial Compound Freezer Repair Work Orders**

Government provides data on historical workload in this technical exhibit. This data is raw and represents actual communication among customers, maintenance planners, and artisans. The data is as it appears in the maintenance management system except for removal of personal information, inappropriate language, and acronyms expanded as practicable. Each set of data includes a ticket number, ticket date, and a problem description. The tickets approximate the work required during the base one-year period.

The work orders numbers in this technical exhibit may not match exactly the workload forecast in Section C-7. There are two reasons. First, customers occasionally submit more than one requirement for a single problem indicating the recorded workload over represents the work performed. Second, artisans perform a substantial fraction of their work on verbal orders or on their own initiative indicating the recorded workload under represents work performed. However, the net result approximates actual work required.

We audited by sampling the workload in each technical exhibit. We also sought subject matter expert advice on the amount of over- and under-reporting in each area. The result is our estimate of the amount of over- and under-reporting of each workload set. Thus, to get the forecast values in C-7 for the workload in this Technical Exhibit, we increased the number of tickets by 20 percent to adjust for under reported tickets.

Ticket Number	Date	Description
91630	10/24/00	Reinstall freezer panels and insulation on the upright freezer behind bldg 1006. I will send to DRMO and task an order form a replacement. Thanks.
92057	10/30/00	Freezer that was delivered on 10/27/00 has not reached desired temp of -100 degrees F. Temp today @0700 was -86 degrees. There is no product stored, therefore no reason to open door. Please expedite repair.
93940	11/20/00	Chest freezer in mixing room not maintaining -44 it is staying at -33 this is a work stoppage
93955	11/20/00	Chest freezer in mixing room is not maintaining -48 this is a work stoppage, it went down Friday Nov 17-2000.
94404	11/27/00	Freezer not working will send to building 1006. Thanks
95999	12/13/00	Freezer in Canopy shop is cycling on and off continuously.
96210	12/15/00	Freezer in canopy shop is cycling on and off continuously.
99078	01/22/01	Walk-in freezer is up to 20 degrees. Should be zero.
101099	02/10/01	Freezer keeps cycling over and over had to unplug to keep from over heating. This is the second ticket on this problem. Please repair ASAP.
101332	02/13/01	Freezer is not working need help ASAP losing parts.
101647	02/15/01	So-Low w freezer in heat treat area has temp rising- need service ASAP will cause work stoppage in heat treat area soon

Industrial Compound Freezer Repair Work Orders (continued)

N00421-03-R-0060

Ticket Number	Date	Description
103019	03/05/01	Freezer had defrosted motor don't sound like it's running work stoppage.
103676	03/12/01	Freezer will not maintain temperature.
104311	03/19/01	Chest freezer that needs to be at -48 is at -18 and is not going down.
104361	03/19/01	Huge freezer down won't come up. Work stoppage
104595	03/21/01	Freezer in canopy shop is inoperable was repaired recently, but when turned on it never got cold and the motor kept recycling.
104744	03/22/01	Freezer in canopy shop is inoperable. Was repaired recently, but when turned off it never got cold and the motor kept recycling.
105174	03/28/01	Check freezer to make sure temp is working correctly freezer is located next to wotan along wall
107886	04/30/01	Walk in freezer down
109244	05/15/01	Freezer not working again.
110003	05/23/01	Freezer is not working. This is the 3rd ticket input on this freezer since 11/00 (ref ticket numbers 93909 and 104311). Last ticket was closed and the freezer was never fixed. If this unit is ber please advise so we can fund to have it replaced.
111947	06/14/01	So-Low freezer will not go back to proper temp. Since power outage Sunday.
112854	06/26/01	Freezer needs an alarm and a different plug. The EIN would not take in the system-65923030757
113490	07/05/01	Deep freezer is to warm, work stoppage
113637	07/06/01	Freezer is down in 4224 HDSC. Freezer needs to be repaired ASAP. Work stoppage.
114953	07/24/01	Ink pen for freezer chart needs to be changed ASAP. Part # for ink pen is 605 004 02. Omega engineering
115287	07/26/01	Work stoppage! Freezer temperature will not maintain set temp. Should be -90-100% it goes down as low as -1%. This freezer is used to store potting.
116118	08/06/01	Hazardous materials freezer is slowing rising in temperature and will affect materials inside. This will affect a work stoppage condition in support of the production line. Freezer is located in sse cage in AV-8 harrier hanger area just right of door
116674	08/13/01	Repair walk in freezer
117267	08/20/01	This freezer was down when we came in today I don't know when it went out. This is the only chest freezer we have for film. (work stoppage).
117582	08/22/01	This freezer is staying at -67 and we need it to be -90 or better before we can use it for potting.
118177	08/29/01	Freezer: freezer in mixing room, bldg 137, check temperature reading, showing -60 F, to maintain -100 F.
118181	08/29/01	Freezer: check freezer in mixing room, bldg 137, check temperature, showing -60 F, to maintain -100 F.
118188	08/29/01	Freezer: check freezer in mixing room, bldg 137, freezer showing -75 F, to maintain -100 F.
119951	09/21/01	Freezer in canopy shop isn't working properly. Temperature is reading 40 degrees; it is set at -60 degrees. Please repair ASAP.
120139	09/24/01	So-low freezer will not maintain -100 at the present time; it is -61. On Friday 9/21 the freezer was at +5 which is unacceptable for the sealants.

TE 3.36 – Woodwork and Carpentry Repair Work Orders

**TE 3.37 – Maintenance Painting Work Orders**

Government provides data on historical workload in this technical exhibit. This data is raw and represents actual communication among customers, maintenance planners, and artisans. The data is as it appears in the maintenance management system except for removal of personal information, inappropriate language, and acronyms expanded as practicable. Each set of data includes a ticket number, ticket date, and a problem description. The tickets approximate the work required during the base one-year period.

The work orders numbers in this technical exhibit may not match exactly the workload forecast in Section C-7. There are two reasons. First, customers occasionally submit more than one requirement for a single problem indicating the recorded workload over represents the work performed. Second, artisans perform a substantial fraction of their work on verbal orders or on their own initiative indicating the recorded workload under represents work performed. However, the net result approximates actual work required.

We audited by sampling the workload in each technical exhibit. We also sought subject matter expert advice on the amount of over- and under-reporting in each area. The result is our estimate of the amount of over- and under-reporting of each workload set. Thus, to get the forecast values in C-7 for the workload in this Technical Exhibit, we first decreased the number of tickets by 2.9 percent to adjust for over-reported requirements. The then increased the number of tickets by 20 percent to adjust for under reported tickets.

Ticket No	Date Created	Problem Type	Description
89633	10/2/00	Exterior	Paint the wall facing bldg 133 of the C-Scan bldg.
89635	10/2/00	Paint	Hydro-stop the flashing on the hangar windows above mezzanine F.
